Summary:

- AWS and DevOps Engineer with 3+ years of hands-on experience designing and managing scalable cloud infrastructure, implementing CI/CD pipelines, and containerizing microservices using Docker. Proficient in core AWS services (EC2, S3, VPC, IAM, Route 53,RDS), infrastructure monitoring (Prometheus, Grafana, CloudWatch), and centralized logging using the ELK Stack. Adept at resolving infrastructure issues, automating deployment workflows, and ensuring system reliability in production environments.

Responsibilities:

- Focused on setting up DEV and QA environments using Docker and various DevOps tools.
- Utilized reverse proxy with Traefik for load balancing and efficient traffic routing across microservices.
- Designed and implemented a centralized logging system using the ELK Stack (Elasticsearch, Logstash, Kibana) from scratch.
- Integrated Grafana for real-time performance monitoring and alerting.
- Resolved L2-level technical issues related to infrastructure, deployments, and system behaviour.
- Handled daily operational tasks, including deployments, log monitoring, and system health checks.
- Actively involved in deployment coordination with DEV and QA teams.
- Monitored error logs, application performance, and API failures using monitoring tools such as Prometheus and Uptime Kuma.
- Managed AWS cloud infrastructure including services like EC2, S3, EBS, VPC, ELB, AMI, IAM, Route 53, Auto Scaling, CloudWatch, and Security Groups.
- Installed and configured applications on AWS EC2 instances based on environment requirements.
- Created and managed S3 buckets, including lifecycle policies, access policies, and encryption.
- Architected secure and scalable VPC networks using public/private subnets, Network ACLs, and Security Groups.
- Worked with version control tools such as GitLab for source code management and CI/CD integration.

Certifications:

- AWS Cloud Practitioner — Issued: Jan 2023 |
- Credential ID: https://www.credly.com/badges/a1647840-da92-45d1-b1c5-70551fa537c8/public_url

Technical Skills:

- Operating system : Linux (Ubuntu, CentOS)
- Cloud Platforms & Services : AWS(EC2, S3, EBS, VPC, ELB, AMI, IAM, Security Groups).
- Containerization : Docker, Docker Compo
- Orchestration : Docker Swarm, Nomad, Kubernetes(k8s)
- Reverse Proxy : Traefik
- CI/CD : Jenkins
- Version Control : GitHub, Bitbucket
- Database servers : MYSQL, PostgreSQL
- Log monitoring : ELK Stack (Elasticsearch, Logstash, Kibana), Grafana, Prometheus
- Monitoring Tools : Cloud Watch, sentry,Uptime Kuma
- Ticketing Tools : Jira

Work Experience:

DevOps Engineer – CstoreIQ

Oct 2023 – Present | Hyderabad, India

- Provisioned secure, containerized development environments using Docker and Traefik, reducing deployment time by 30% through automated setup and configuration.
- Configured Traefik reverse proxy to route traffic by subdomains and path prefixes, enabling efficient microservices communication.
- Implemented automated SSL certificate management using Let's Encrypt for secure domain access.
- Built and configured the ELK Stack (Elasticsearch, Logstash, Kibana) from scratch to enable centralized logging, monitoring, and log analysis.
- Designed and deployed Grafana dashboards and alerts to monitor application performance and system health.
- Containerized multiple microservices to ensure scalable, consistent, and portable deployments across environments.
- Automated end-to-end CI/CD pipelines using Jenkins, enabling continuous integration and continuous deployment with minimal manual intervention.
- Actively learning Kubernetes (K8s) to enhance DevOps skills and prepare for the migration from Docker Swarm to Kubernetes.

TechOps Engineer (L2 Support) – YVS

Mar 2022 – Sep 2023 | Hyderabad, India

- Resolved L2-level technical issues escalated from the L1 Monitoring Team.
- Participated in application deployments and post-deployment testing.
- Monitored and analysed server logs to identify application issues.
- Assisted in debugging errors by working closely with the development team.
- Verified and queried database records to troubleshoot daily application issues.

AWS Intern – Conduira

Oct 2021 – Jan 2022 | Remote

- Completed the AWS re/Start training program through AWS Training and Certification.
- Gained hands-on experience with EC2, IAM, VPC, S3, and CloudWatch.
- Completed tasks such as provisioning EC2 instances, configuring user roles and permissions, creating static websites on S3, and setting up private networks.
- Learned and practiced over 10 AWS services during the internship.
- Successfully earned the **AWS Certified Cloud Practitioner** credential.

Education Details:

****Bachelor of Technology (B.Tech), REVA University, Bangalore ****	2017 – 2021	CGPA: 8.4/10
****Class XII – Andhra Pradesh State Board****	2015 – 2017	92%
****Class X – Andhra Pradesh State Board****	2015	92%

Declaration:

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
